

ALL-IN-ONE POOL ENHANCER

Salt Master

Perfect Pool Water Treatment for Salt Pools

Choose Salt Master for the ideal blend of pool water enhancing agents made specifically for salt pools. Just one weekly dose reduces the need for acid, boosts performance and decreases the frequency of necessary balance adjustments and cleanings. It's compatible with ALL pool surfaces and equipment, plus there is no waiting time to swim.

Salt pool maintenance is easier, more convenient and less time consuming than for traditional chlorine pools. With a salt chlorine generator, pool water is velvety smooth and there's no need to carry heavy jugs or pails to repeatedly add chlorine. Salt pools, however, do need salt-specific additives to run optimally and efficiently.

- **Boosts water quality & clarity**
- **Reduces the need for acid**
- **Prevents scale buildup on salt plates**
- **Extends life of salt chlorine generator**
- **Keeps phosphate levels low**
- **A single weekly dose**
- **Safely swim right away**

Salt Master keeps equipment in top shape and increases the life and performance of salt chlorine generators. This special formula prevents scale buildup on generator cells, pool equipment and surfaces. In fact, most salt chlorine generators can be operated at lower settings after using Salt Master for just a few weeks!
