

REDUCES EVAPORATION & SAVES WATER

Aqua Blanket™

For Swimming Pool Water Conservation

"Six to eight feet a year is simply the evaporation rate in the parched Southwest," writes Scott Webb, Executive Editor of AQUA Magazine in his editorial entitled "It's Time." "We can't say we're serious about conserving water if we leave (a swimming pool) sitting out in the sun," Webb continues. "It's time for every pool in the SW to be covered."

While traditional pool covers (solar blankets) physically cover pools and reduce evaporation, they're hard to maneuver and can quickly rot. These covers also prevent you from enjoying the beauty of your pool. Get the benefits of a pool cover without the expense or hassle. Save pool water and its replacement cost with **Aqua Blanket!**

A Southwest pool will lose all of its 18,000 gallons of water every year through evaporation *

How does Aqua Blanket work?

Its advanced *Monolayer Technology* modifies the surface layer of water, just one molecule deep, allowing for dramatically reduced evaporation.

- You cannot see it, feel it, smell it or taste it
- Non-toxic and biodegradable
- Natural plant-derived formulation
- Very stable unlike other liquid products based on volatile alcohols

Up to 40% or 7,200 gallons will be conserved with Aqua Blanket

Aqua Blanket suppresses pool water evaporation

- Long-lasting, only 1 small dose per week
- Safe for all pool surfaces, including vinyl
- Compatible with all sanitizing methods
- Conserves your water and your money

Save water AND preserve the beauty and instant availability of your pool!

CONSERVES WATER & HEAT

Aqua Blanket™

Invisible Barrier to Evaporation and Heat Loss

Now you can have all the benefits of a pool cover without the hassle! Enhance bather comfort and save money with Aqua Blanket™ by Lo-Chlor®. Advanced *Monolayer Technology* modifies the surface layer of water, just one molecule deep, allowing for reduced evaporation and better cool-weather heat retention. Competitor products are based on volatile alcohols but, due to its unique plant-derived formulation, Aqua Blanket is stable and its benefits are long-lasting.

Aqua Blanket is safe, non-toxic and biodegradable. Its formulation is compatible with all pool water sanitizing methods and all pool surfaces. So easy to use... just one small dose per week poured onto the water's surface conserves water and energy while delivering comfort and a longer swim season. Avoid an unsightly pool cover and maintain the aesthetic quality of your pool!

- **Energy-saving invisible barrier**
- **Greatly reduces cool-weather heat loss**
- **Dramatically reduces water evaporation**
- **Saves money**
- **Extends swim season**
- **Safe, non-toxic, biodegradable**
- **Compatible with all sanitizing methods**
- **Safe for all pool surfaces, including vinyl**
