

LIQUID STABILIZER FOR SWIMMING POOLS

EZ•Pour Stabilizer

Instantly Extends the Life of Pool Chlorine

Stop chlorine loss with EZ-Pour Stabilizer, Lo-Chlor's amazing liquid solution that makes the most of your valuable time. Outdoor pools endure the sun's UV rays that strip chlorine of its effectiveness. Fast and simple liquid dosing means:

- No more wasted time brushing undissolved lumps
- No more clogged filters
- No more pool stains as with a dry stabilizer
- No more wasted stabilizer from spillage or aging

Your chlorine will last many times longer in properly stabilized pool water. Easy dosing! Just shake well and pour EZ-Pour Stabilizer into pool water while walking around the pool's edge. Add one gallon per 10,000 gallons of water for each 32 ppm stabilizer increase desired. Target a total of 30 ppm to 80 ppm stabilizer to make pool chlorine last 6-10 times longer than unstabilized chlorine.

- **Reduces chlorine loss from UV rays**
- **Dissolves instantly, protects immediately**
- **Professional strength**
- **Ready to use**
- **Safe and effective for ALL chlorine types and salt pools**
- **Non-acidic formula is gentle on all pool surfaces**
